

Are you interested in volunteering as a healthy control?

If so, you may be eligible for a study to identify a biological marker (biomarker) of b2 (.2(e)ki)-7908 6

presence of disease or that changes over time in a way that can be linked to the progression of disease. These biological measures will help develop treatments for Parkinson's, particularly therapies that could slow or stop progression.

- **Who might benefit from this research?** If successful, this research will benefit people with PD through earlier diagnosis and as a means to detect how well treatments are working.
- **Who qualifies for the study?** Individuals over age 45, including caregivers of patients, qualify to be screened for the study.
- **What is involved if I participate?** During one visit to the Shirley Ryan AbilityLab Parkinson's Disease and Movement Disorders Program, volunteers will provide a 250 cc blood donation have several clinical assessments and take written surveys.
- **Will I be compensated for participation?** Participants will receive \$35 compensation for travel and parking.

IRB Project #: STU00209668

Principal Investigator: Jennifer G Goldman, MD, MS

This study is supported by a grant from The Michael J. Fox Foundation for Parkinson's Research.
